## ***NERRS Volunteer Opportunities***

The National Estuarine Research Reserve System is a network of 27 coastal reserves protected for purposes of research, education and stewardship. This partnership between the National Oceanic and Atmospheric Administration and the individual coastal states provides many opportunities for volunteers interested in protecting coastal resources for future generations. Volunteers can participate in a wide range of activities vital to the reserves, including scientific monitoring, restoration projects, educational programs, administration, visitor services and fund raising. For more information, contact the reserve nearest you (see reverse for map of the reserve system):
